SM Samiul Hossain	230042110
SM Raiyan Al Arafat	230042134

Ayman Rahman Bhuiyan	230042140
Shudipto Sarwar	230042142
Mohamamd Faiaj Jarif	230042152

FR-01: Record Category Selection

The system shall require medical staff to select either an Emergency Record or a Diagnosis Record before creating a patient record.

FR-02: Minimal Registration for Emergency

The system shall allow medical staff to create an Emergency Record using only a valid Student ID or Staff ID.

FR-03: Emergency Record Creation

The system shall store the following information in an Emergency Record:

- Patient ID
- Emergency Description
- Record Timestamp

FR-04: Diagnosis Record Creation

The system shall store the following information in a Diagnosis Record:

- Patient ID
- Diagnosis Findings
- Referral Status
- Referral Information (if applicable)
- Treatment Instructions
- Attending Doctor's Name
- Record Timestamp

FR-05: Diagnosis Record Access

The system shall store the following information in a Diagnosis Record:

- Patient ID
- Diagnosis Findings
- Referral Status
- Referral Information (if applicable)
- Treatment Instructions
- Attending Doctor's Name
- Record Timestamp

FR-06: Diagnosis Record Update

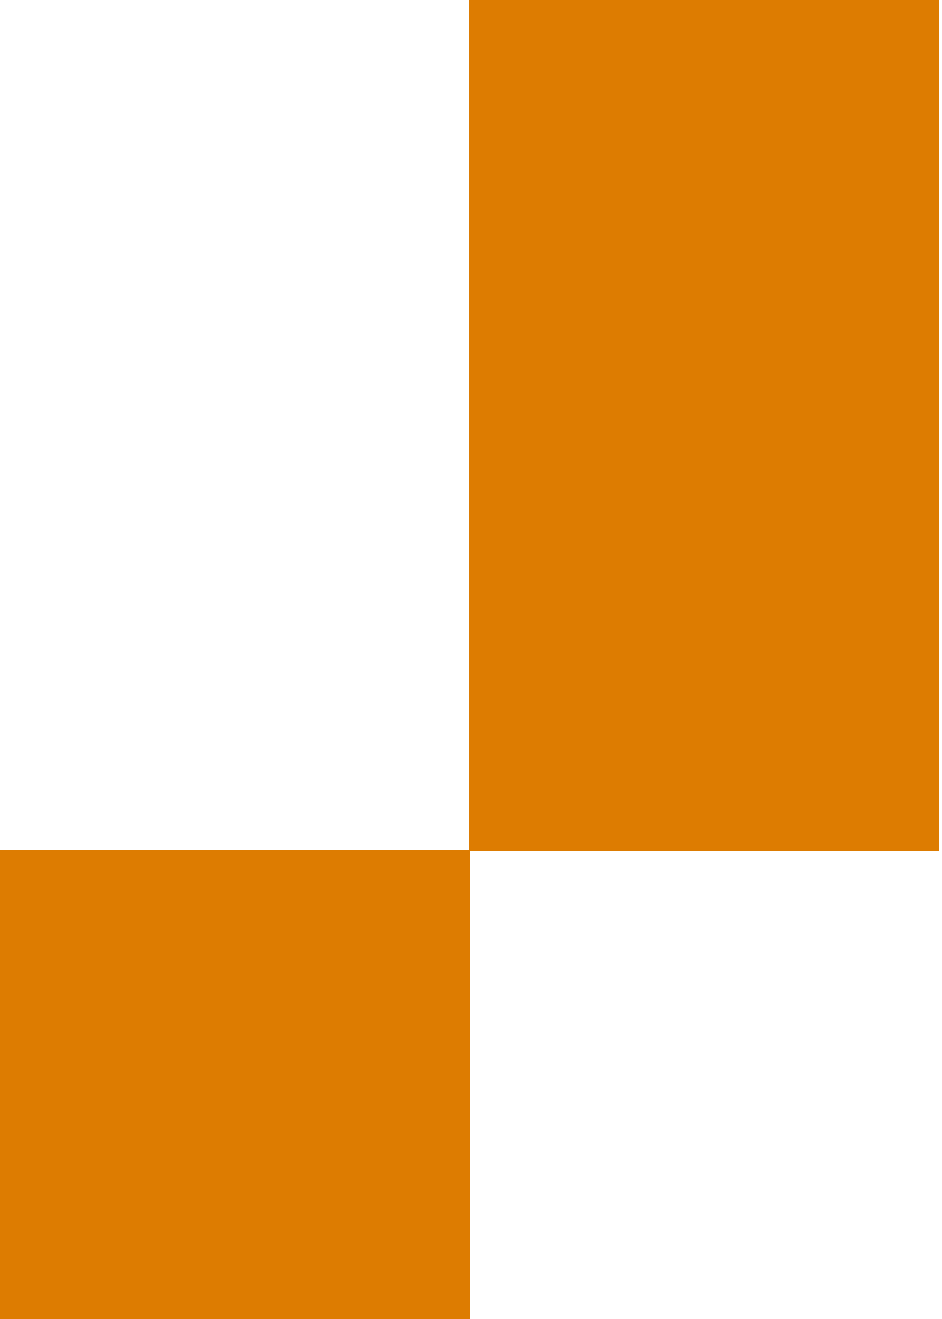

The system shall allow authorized medical staff to update diagnosis records.

FR-07: Local Data Validation

The system shall validate record information locally before saving, regardless of internet connectivity.

FR-08: Offline Record Storage

The system shall store Emergency Records and Diagnosis Records in a local database when the central server is unavailable and mark them as Pending Synchronization.

FR-09: Emergency Outcome Recording

The system shall allow medical staff to record whether an emergency patient has recovered or requires hospital transfer.

FR-10: Hospital Transfer Creation

The system shall allow authorized medical staff to create a hospital transfer for emergency patients requiring further treatment.

FR-11: Emergency Transfer Slip Generation

The system shall generate a digital Emergency Transfer Slip for transferred patients.

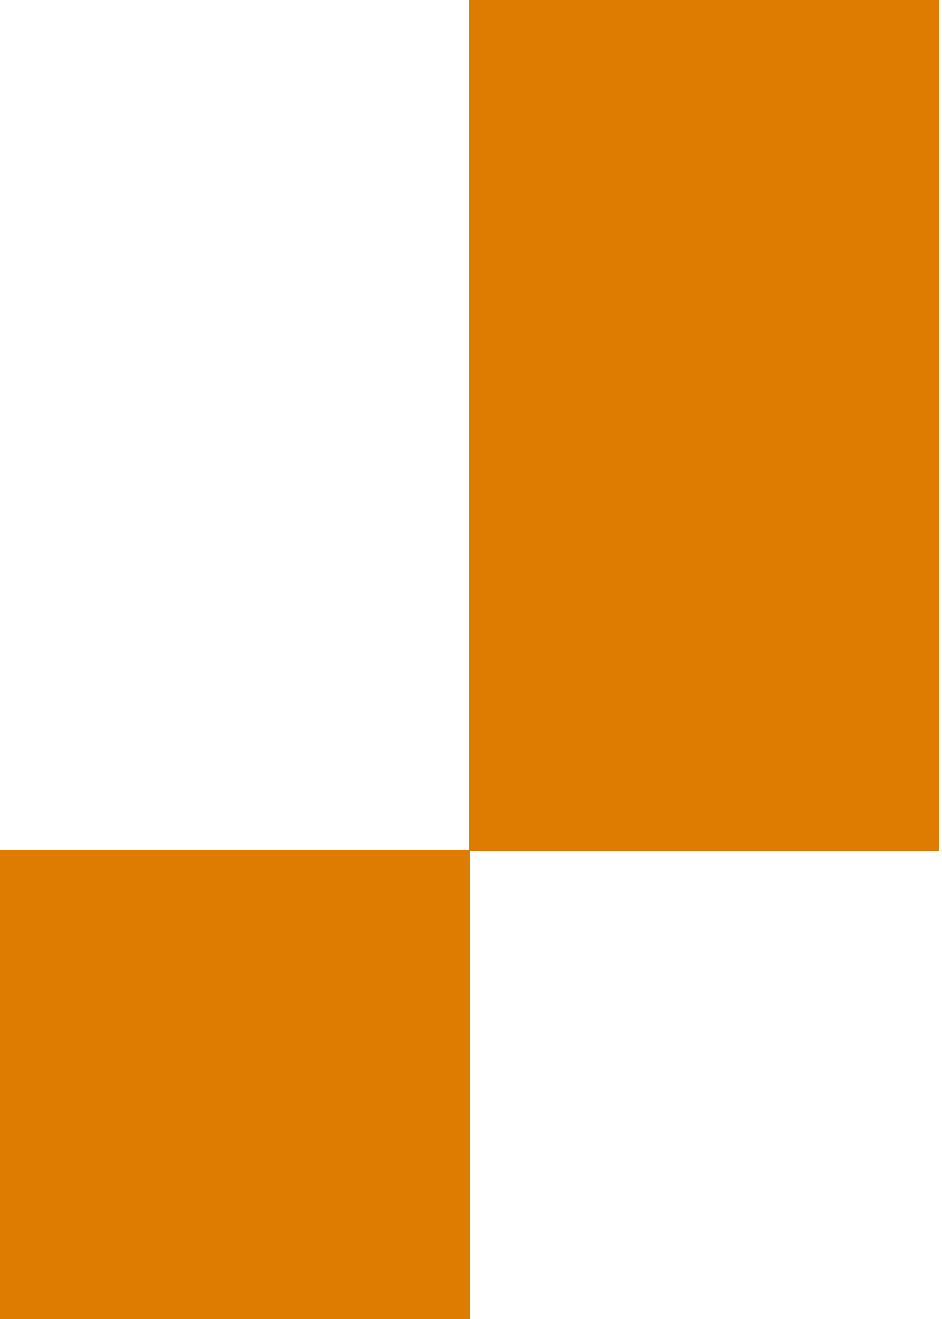

FR-12: Emergency Transfer Slip Information

The system shall include the following information in an Emergency Transfer Slip:

- Patient ID
- Emergency Description
- Destination Hospital
- Attending Medical Staff Name
- Transfer Timestamp

FR-13: Emergency Transfer Slip Delivery

The system shall allow users to view, download, or print an Emergency Transfer Slip.

FR-14: Referral Creation

The system shall allow authorized medical staff to create a referral for patients requiring treatment outside the IUT Medical Centre.

FR-15: Referral Record Creation

The system shall create a referral record containing:

- Referral ID
- Patient ID
- Referral Category
- Referral Reason
- Destination Hospital (if specified)
- Referred Doctor (if specified)
- Attending Doctor's Name
- Referral Timestamp

FR-16: Referral Category Selection

The system shall allow medical staff to assign a referral category, including:

- Cardiology
- Dermatology
- General Medicine
- Other

FR-17: Referral Slip Generation

The system shall generate a Referral Slip from a referral record.

FR-18: Referral Slip Delivery

The system shall allow users to view, download, or print a Referral Slip.

FR-19: Referral Record Access

The system shall allow patients and authorized medical staff to access referral records.

FR-20: Referral Record Update

The system shall allow authorized medical staff to update referral records.
